

Instructions for preparing your print file, regardless of the print media you have chosen

60/80/85/100/120/150/200 cm

Depending on the size of the roll-up banner you have chosen

Example: An 85×200 cm roll-up banner needs a graphic exactly 850 mm wide (no extra bleed).

LEGEND

-  This part of the graphic is held by the top rail
-  This part of the graphic stays rolled up in the base
-  Visible area of the graphic once mounted on the stand
-  Avoid placing text or graphic elements in this area

PRINT FILE REQUIREMENTS

FILE FORMATS

PDF, TIFF, EPS, AI, CDR

PDF – our preferred file format

All fonts and graphics must be embedded in the PDF file
The document must be in **CMYK** at actual size, with raster images at 150–200 dpi

TIFF – For minimum file size and maximum quality: save the file with LZW compression and without paths, masks or layers.
The document must be in **CMYK** at actual size and 150–200 dpi resolution

EPS / AI – All text must be converted to outlines. Raster images must be embedded, not linked.
The document must be in **CMYK** at actual size and 150–200 dpi resolution

CDR – All text must be converted to curves
All objects must be in **CMYK** at actual size and all raster images must be 150–200 dpi
